**Howto Section Mastering Key Concepts** Lets tackle some key concepts with practical examples

**1 Calculating GDP** GDP Gross Domestic Product measures the total value of goods and services produced within a countrys borders in a specific period There are three main ways to calculate GDP

**Expenditure Approach** GDP = C Consumption + I Investment + G Government Spending + XM Net Exports

**Income Approach** Summing up all the incomes earned in producing goods and services

**ValueAdded Approach** Summing up the value added at each stage of production

**Example** Imagine a bakery The valueadded approach would consider the cost of flour sugar and labor to make the dough then add the value added when the bread is baked and finally the value added when its sold

**2 Understanding Inflation** Inflation is a general increase in the price level of goods and services in an economy over a period of time The Consumer Price Index CPI is a commonly used measure

**Example** If the CPI rises from 100 to 105 inflation is 5 This means the average price of goods and services has increased by 5

**3 Analyzing Monetary Policy** The central bank like the Federal Reserve in the US uses monetary policy to influence the money supply and interest rates

**Expansionary monetary policy** lowering interest rates stimulates the economy while **contractionary policy** raising interest rates slows it down

**Example** If the central bank lowers interest rates borrowing becomes cheaper encouraging investment and consumption leading to increased economic activity
